

NDMTSS FROM DATA TO ACTION: BUILDING AN EARLY WARNING SYSTEM TO GUIDE RESPONSES AT EVERY TIER

3A

NDMTSS
North Dakota Multi-Tier
System of Supports

Building an Early Warning System (EWS) around attendance, behavior, and course performance helps develop targeted responses at the district, building, grade-level/department, classroom, small-group, or individual levels. While this is not a training course specific to Infinite Campus, it is about maximizing the data within it for MTSS decision-making. EWS is a continuous improvement process that starts with the health of universal systems and directs resources to the most efficient and effective response level.

AFTER THE TRAINING, YOU'LL BE ABLE TO:

- ▶ Interpret attendance, behavior, and course-performance data pulled from Infinite Campus to establish a consistent Early Warning System (EWS) data-review process
- ▶ Assess system health before student-level risk by examining whether universal supports are sufficient
- ▶ Disaggregate and analyze EWS data to identify meaningful patterns
- ▶ Determine the appropriate level of response by matching the scope of the intervention to the scope of the identified need
- ▶ Develop an action plan for ongoing data use
- ▶ Two (2) Continuing Education credits will be available through Valley City State University for an additional charge.

3 FULL-DAYS | IN-PERSON | JAMESTOWN

Dec. 1

Dec. 2

March 22

Coaching Calls: January 15 & May 3

Training Facilitator:
Shannon Harken
MTSS School Improvement Consultant

Training Facilitator:
Tina Bryn
NDMTSS Coordinator & Coach

Training Facilitator:
Brandie Delzer
NDMTSS Coordinator & Coach
